

A diagram illustrating a file path transformation. At the bottom is a white box containing a list of file paths, with the last one being a C source file. A blue arrow points upwards from this box to a gray box above it. The gray box contains the same list of file paths, but the last one is an H header file, indicating that the source file is being converted or moved to a header file format.

```
/home/carlo/data/GeN  
-Foam/GeN-Foam_ffn/GeN  
-Foam/GeN-Foam/classes  
/thermalHydraulics/src/physicsModels  
/dragModels/twoPhaseDragMultiplierModels  
/Kaiser88/Kaiser88TwoPhaseDragMultiplier.H
```

```
