

calcMask

```
graph LR; A[calcMask] --> B[calcfieldDiffExtents];
```

A diagram showing a call from the function `calcMask` to the function `calcfieldDiffExtents`. The `calcMask` box is gray with a black border, and the `calcfieldDiffExtents` box is white with a red border. A blue arrow points from the right side of the `calcMask` box to the left side of the `calcfieldDiffExtents` box.
