

setInitOneGroupFlux

```
graph LR; A[setInitOneGroupFlux] --> B[setFeedbackCellField];
```

The diagram consists of two rectangular boxes connected by a horizontal arrow. The left box is gray with a black border and contains the text 'setInitOneGroupFlux'. A dark blue arrow points from the right side of this box to the left side of the right box. The right box is white with a red border and contains the text 'setFeedbackCellField'.

setFeedbackCellField
