

subCooledBoilingFraction
Model

```
graph BT; constant[constant] --> model[subCooledBoilingFraction Model];
```

A diagram illustrating a model input. A gray rectangular box labeled 'constant' is positioned below a larger white rectangular box with a red border labeled 'subCooledBoilingFraction Model'. A blue arrow points vertically from the top center of the 'constant' box to the bottom center of the 'subCooledBoilingFraction Model' box, indicating that the constant value is an input to the model.
