

A diagram illustrating a file path transformation. At the bottom, a red-outlined box contains a list of file paths. A blue arrow points upwards from this box to a grey-outlined box at the top, which contains the modified list of file paths. The paths are identical except for the final file name, which changes from 'solveNeutronicsSN.H' to 'setXSFieldsSN.H'.

```
/home/carlo/data/GeN  
-Foam/GeN-Foam_ffn/GeN  
-Foam/GeN-Foam/classes  
/neutronics/SN/include/setXSFieldsSN.H
```

```
/home/carlo/data/GeN  
-Foam/GeN-Foam_ffn/GeN  
-Foam/GeN-Foam/classes  
/neutronics/SN/include/solveNeutronicsSN.H
```
